If the magnetic attraction matches the positive and negative electrodes, they will be directly connected.

Warm tips:

Do not use the fast charging power adapter. The battery is easy to be damaged.

SIM Card Install Guide

Plug-in SIM card: Please make sure that the device is off before installing SIM card.

Pay attention to the direction of the SIM card and confirm that the waterproof ring is installed properly. The arrow on the SIM card cover points towards the watch strap and tighten the screw. After plugged-in SIM card and power on, wait for one minute to see if the GSM/LTE signal is shown on the display screen.

Standard -SIM card		25mm×15mm	
Micro-SIM card		15mmx12mm	SIM1
Nano-SIM card		12mm x 9mm	SIM2

Please check:

1. If you can call the watch with your phone.

Check whether the signal is normal and whether the SIM card has data function.

2. this device supports 2G and 4G network, support VOLTE

App Installation

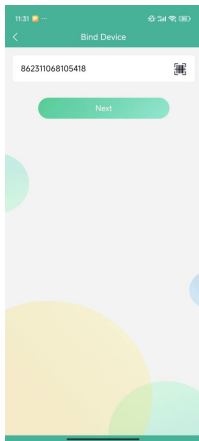

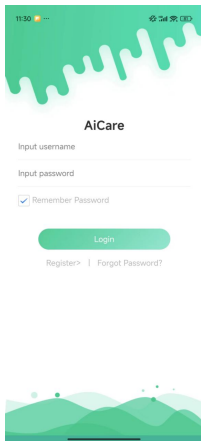

After the watch is activated with SIM card, please install the watch APP on your mobile phone before using the watch. Below are two ways to install app:

A: Scan below QR code;

B: Search “ai care” on GooglePlay or iOS store to download the watch APP.

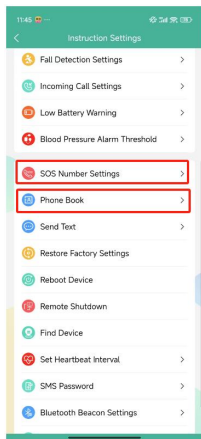

2) After App installation, please create a new account and enter basic information like user name, password, mail box, etc. Then enter the login page, input the phone number or mail box and password while registration, and finally press “sign in” to enter.

- 3) If it's the first time you login the account, you will be requested to bind the watch and the App with the device's IMEI code.
- 4) Enter into device "User information", and input the requested information, such as profile picture, nickname, birthday, height, weight, etc.

Two way call

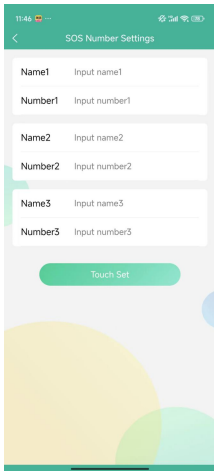

Enter into Watch Setting on the front page of the App, you can add contact phone number for your watch.

In the app, you can set 10 phone books.

- 1、 only the first phone book is valid
- 2、 Long press the green button to make a call to the first phone book number
- 3、 During the call, press the red button once to end

SOS Call

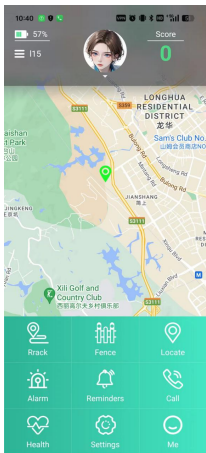

App main page - Setting – SOS Number setting, input maximum 3 numbers and confirm setting to synchronize it to the watch. Press the watch red button over 3 seconds, it will call the SOS numbers one by one, at the same time, an alarm will be sent back to server.

On the app you set the incoming call restriction switch to on, then you can only receive calls from the sos number list and phone book list

GPS Positioning

On the App “Home Page”, press “Locate” to enter into sitemap and check device location.

There are 3 types of working modes:

1. Default mode, the band use Wifi + LBS, send the location to the server every 15 minutes.

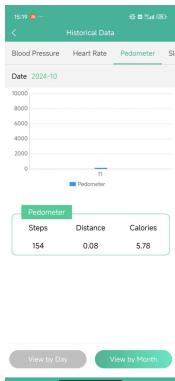

2. Emergency mode, the band use GPS + Wifi + LBS, send the location to the server every minute.

3. battery saving mode, the band opens Wifi + LBS, send the location to the server every 60 minutes.

Note: There might be position deviation or App update failure due to signal weakness sometimes.

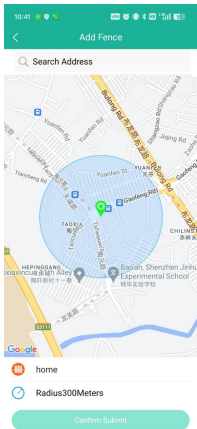

Pedometer

App "Home Page", press "Health", you can check the number of steps. The app will display the latest user steps from 0:00 today to the current time, It will go to 0 at 0 o'clock every day. You can also view more detailed exercise information on health page in the App, such as steps, distance, calories, etc.

Security Fence

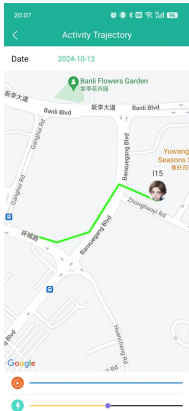

In the Electronic Fence interface, you can set up a secure fence area. select its range, confirm to save it. You can repeat it to add several secure fence areas. You can also modify it or remove the security fence you set up earlier.

When users leave or enter the electronic fence, the app will receive an alarm message. However, due to the setting of the positioning mode and considerations for power saving, the alarm information may not be very timely. When you need to view the user's latest location, please go to the App "Home Page", press "Locate"

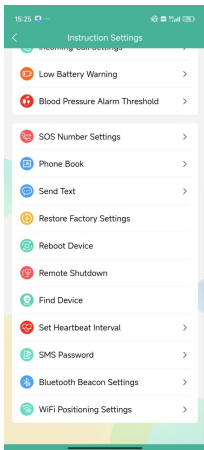

Trajectory History

Trajectory tracking interface, you can check the latest trajectory history. Enter trajectory tracking page, the above setting button you can choose to load lbs / Wi-Fi data or not. Below you can select the date to view the historical track

Due to the setting of the positioning mode, for the sake of battery saving, not all locations passed by users will be recorded. Therefore, the historical trajectory function does not appear to be completely consistent with the user's actual trajectory.

Other Functions

For other function Settings , see the left demonstration picture. You can set it on the function page

Because our app is used to manage all our products, some features of the app are not suitable for this model. If you encounter any features that cannot be used, please consult your distributor.
