Please check:

- 1) If the device time is synchronized with the current time.
- 2) If you can call the watch with your phone.

If you have any problem, please contact your local dealer for help

Magnetic charging pin: Connect the watch with power input to charge it.

App Installation

After the watch is activated with SIM card, please install the watch APP on your mobile phone before using the watch. Below are two ways to install app :

- 1) a. Scan below QR code;
- b. Search “ai care” on GooglePlay or iOS store to download the watch APP.

2) After App installation, please create a new account and enter basic information like user name, password, mail box, etc. Then enter the login page, input the phone number or mail box and password while registration, and finally press “sign in” to enter.

3) If it's the first time you login the account, you will be

requested to bind the watch and the App with the device's IMEI code.

4) Enter into device "User information", and input the requested information, such as profile picture, nickname, birthday, height, weight, etc.

Two way call

Enter into Watch Setting on the front page of the App, you can add contact phone number for your watch.

In the app, you can set 10 phone books.

1. Swipe to select a contact, click to dial

The calling can input numbers to make phone calls

SOS Call

App main page - Function – SOS Number, input maximum 3 numbers and confirm setting to synchronize it to the watch. Press the watch main button over 3 seconds, it will call the SOS numbers one by one, at the same time, an alarm will be sent back to server.

On the app you set the incoming call restriction switch to on, then you can only receive calls from the white list.

GPS Positioning

On the App “Home Page”, press “Location” to enter into sitemap and check device location.

There are 3 types of working modes:

1. Default mode, the watch opens Wifi + LBS, send the location to the server every 15 minutes.

2. Emergency mode, the watch opens GPS + Wifi + LBS, send the location to the server every minute.

3. Energy saving mode, the watch opens Wife + LBS, send the location to the server every 60 minutes.

Note: There might be position deviation or App update failure due to signal weakness sometimes.
